PPG applications in healthcare with a strong focus on the contribution of PPG in wearable sensors and PPG for cardiovascular assessment Presents the underlying principles and technology surrounding PPG Includes applications for healthcare and wellbeing Focuses on PPG in wearable sensors and devices Presents advanced signal analysis techniques Includes cutting edge research applications and future directions

An Introduction to Audio Content Analysis

Alexander Lerch,2012-11-05 With the proliferation of digital audio distribution over digital media audio content analysis is fast becoming a requirement for designers of intelligent signal adaptive audio processing systems Written by a well known expert in the field this book provides quick access to different analysis algorithms and allows comparison between different approaches to the same task making it useful for newcomers to audio signal processing and industry experts alike A review of relevant fundamentals in audio signal processing psychoacoustics and music theory as well as downloadable MATLAB files are also included Please visit the companion website www.AudioContentAnalysis.org

The Domain of Language Michael

D. Fortescue,2002 This book is intended as counter evidence to the perception of Linguistics as the domain of dusty schoolroom grammar where proponents of one theoretical orientation or the other spend their brief breaks in the playground bashing the others over the head with their favorite abstractions The discipline may appear to outsiders as fragmented and worse still lacking in relevance to the real world outside its gates The purpose is to show that Linguistics in all its varied branches can be entertaining as well as thought provoking and that its domain is indeed a coherent one despite all the internecine squabbling The subject is introduced in an unconventional way as a kind of fable with an historical moral that professional linguists as well as students should enjoy as a commentary on the state of the discipline today

Homo Deus

Yuval Noah Harari,2017-02-21 Official U S edition with full color illustrations throughout NEW YORK TIMES BESTSELLER Yuval Noah Harari author of the critically acclaimed New York Times bestseller and international phenomenon Sapiens returns with an equally original compelling and provocative book turning his focus toward humanity s future and our quest to upgrade humans into gods Over the past century humankind has managed to do the impossible and rein in famine plague and war This may seem hard to accept but as Harari explains in his trademark style thorough yet riveting famine plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges For the first time ever more people die from eating too much than from eating too little more people die from old age than from infectious diseases and more people commit suicide than are killed by soldiers terrorists and criminals put together The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda What then will replace famine plague and war at the top of the human agenda As the self made gods of planet earth what destinies will we set ourselves and which quests will we undertake Homo Deus explores the projects dreams and nightmares that will shape the twenty first century from overcoming death to creating artificial life It asks the fundamental questions Where do we go from here And how will we protect this fragile world from our own destructive powers This is the next stage of

evolution This is Homo Deus With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller Harari maps out our future

Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult partly because it s very different from European languages Following a teacher textbook or language course is not enough They show you the characters words and grammar you need to become proficient in Chinese but they don t teach you how to learn them Regardless of what program you re in if any you need to take responsibility for your own learning If you don t you will miss many important things that aren t included in the course you re taking If you study on your own you need to be even more aware of what you need to do what you re doing at the moment and the difference between them Here are some of the questions I have asked and have since been asked many times by students How do I learn characters efficiently How do I get the most out of my course or teacher Which are the best learning tools and resources How can I become fluent in Mandarin How can I improve my pronunciation How do I learn successfully on my own How can I motivate myself to study more How can I fit learning Chinese into a busy schedule The answers I ve found to these questions and many others form the core of this book It took eight years of learning researching teaching and writing to figure these things out Not everybody has the time to do that I can t go back in time and help myself learn in a better way but I can help you This book is meant for normal students and independent language learners alike While it covers all major areas of learning you won t learn Chinese just by reading this book It s like when someone on TV teaches you how to cook you won t get to eat the delicious dish just by watching the program you have to do the cooking yourself That s true for this book as well When you apply what you learn it will boost your learning making every hour you spend count for more but you still have to do the learning yourself This is what a few readers have said about the book The book had me nodding at a heap of things I d learnt the hard way wishing I knew them when I started as well as highlighting areas that I m currently missing in my study Geoff van der Meer VP engineering This publication is like a bible for anyone serious about Chinese proficiency It s

easy for anyone to read and written with scientific precision Zachary Danz foreign teacher children s theatre artist About me I started learning Chinese when I was 23 that s more than eight years ago now and have since studied in many different situations including serious immersion programs abroad high intensity programs in Sweden online courses as well as on the side while working or studying other things I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language taught entirely in Chinese mostly for native speakers the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University All these parts have contributed to my website Hacking Chinese where I write regularly about how to learn Mandarin
