Transforming Prejudice Melissa R. Michelson, Brian F. Harrison, 2020-03-16 Since the mid 1990s there has been a seismic shift in attitudes toward gay and lesbian people with a majority of Americans now supporting same sex marriage and relations between same sex consenting adults However support for transgender individuals lags far behind a significant majority of Americans do not support the right of transgender people to be free from discrimination in housing employment public spaces health care legal documents and other areas Much of this is due to deeply entrenched ideas about the definition of gender perceptions that transgender people are not real or are suffering from mental illness and fears that extending rights to transgender people will come at the expense of the rights of others So how do you get people to rethink their prejudices In this book Melissa R Michelson and Brian F Harrison examine what tactics are effective in changing public opinion regarding transgender people The result is a new approach that they call Identity Reassurance Theory The idea is that individuals need to feel confident in their own identity before they can embrace a stigmatized group like transgender people and that support of members of an outgroup can be encouraged by affirming the self esteem of those targeted for attitude change Michelson and Harrison through their experiments show that the most effective messaging on transgender issues meets people where they are acknowledges their discomfort without judgment or criticism and helps them to think about transgender people and rights in a way that aligns with their view of themselves as moral human beings The

History of Trans Representation in American Television and Film Genres Traci B. Abbott, 2022-05-02 Due to the increase in transgender characters in scripted television and film in the 2010s trans visibility has been presented as a relatively new phenomenon that has positively shifted the cis society s acceptance of the trans community This book counters this claim to assert that such representations actually present limited and harmful characterizations as they have for decades To do so this book analyzes transgender narratives in scripted visual media from the 1960s to 2010s across a variety of genres including independent and mainstream films and television dramatic series and sitcoms judging not the veracity of such representations per se but dissecting their transphobia as a constant despite relevant shifts that have improved their veracity and variety Already ingrained with their own ideological expectations genres shift the framing of the trans character particularly the relevance of their gender difference for cisgender characters and society The popularity of trans characters within certain genres also provides a historical lineage that is examined against the progression of transgender rights activism and corresponding transphobic falsehoods concluding that this popular medium continues to offer a limited and narrow conception of gender the variability of the transgender experience and the range of transgender identities

Arabs and Muslims in the Media Evelyn Alsultany, 2012-08-20 After 9/11 there was an increase in both the incidence of hate crimes and government policies that targeted Arabs and Muslims and the proliferation of sympathetic portrayals of Arabs and Muslims in the U.S. media Arabs and Muslims in the Media examines this paradox and investigates the increase of sympathetic images of the enemy during the War on Terror Evelyn Alsultany explains that a new standard in racial and cultural representations emerged out of the multicultural movement of the 1990s that involves balancing a negative representation with a positive one what she refers to as simplified complex representations This has meant that if the storyline of a TV drama or film represents an Arab or Muslim as a terrorist then the storyline also includes a positive representation of an Arab Muslim Arab American or Muslim American to offset the potential stereotype Analyzing how TV dramas such as West Wing The Practice 24 Threat Matrix The Agency Navy NCIS and Sleeper Cell news reporting and non profit advertising have represented Arabs Muslims Arab Americans and Muslim Americans during the War on Terror this book demonstrates how more diverse representations do not in themselves solve the problem of racial stereotyping and how even seemingly positive images can produce meanings that can justify exclusion and inequality
